PRICE: EUR 95,- / GBP 86,- / USD 125,-

The devil's in the detail

Day is a minimalist wall clock with an iconic design and understated elegance. Simon Legald has paid close attention to detail in this exclusive wall clock, giving it a discreet three-dimensional effect, which makes the Day clock interesting to observe from different angles.

Small subtleties give Day a distinctive character. The serrated frame in cast aluminium artfully reflects the gears inside the clock. Another detail is the punched interval lines with their softly rounded form, which is repeated in the hands to add cohesion to the design.

The interval lines continue up the clock's edge, where they can be seen from the side. Together with the dome-shaped glass casing and the gently sloping frame, they create a simple, aesthetic impression of depth. Day adds an extra dimension to the classic look, resulting in a stylish and timeless design for everyday enjoyment.
