Iconic design in new colors

Normann Copenhagen is launching the original Krenit bowl in three new colours: gold and silver. The Krenit bowl is a perfect example of excellent Danish design and throughout the years, it has become a design icon. With the addition of the new colors the series now contains a total of 36 bowls in seven colours and six sizes, which can be mixed together as desired.

The Krenit range, with its clean and simple feel, is a contemporary classic, which lets functionality and aesthetics come together flawlessly. The characteristic sharp edge creates a balance between material and shape that gives the bowl its modern feel. The form itself set the standard for later designs of bowls, and the shape makes it just as suitable for a modern home as it was back then.

The new colors will allow enthusiasts to supplement their current collection, while new Krenit lovers can begin their own.
