

THE BONBARON

A chair so soft that it feels like floating.

Here's the story

Ever imagined what it would feel like to sit on a cloud in your living room? Fatboy translates this desire by presenting The BonBaron. A soft single seater that makes you wonder you're not actually floating in the sky.

The BonBaron immediately reveals a typical Fatboy signature. Design with a smile, translated into a bold, inviting lazy seat. A fine piece of furniture with a friendly belly, all yours to enjoy. The BonBaron brings you a completely new indoor seating experience. Think of it as the marshmallow you wished to sink into as a kid, but without the stickiness.

A treat in seating

With a strong core that guarantees The BonBaron's upright shape and a filling that consists of super soft foam, The BonBaron truly is a treat in seating of its own kind. Firm where you want it, soft where you need it. Thanks to clever compartments the filling stays in place, assuring comfortable seating whilst ensuring the design and shape of the chair.

The BonBaron grants you to play with that design. The two inner ropes that strengthen the chair from inside emerge on the back side, where two oversized buttons allow you to adjust the position of the backrest to your convenience. A design that allows you to use The BonBaron how you like it.

Strong and cuddlesome

The BonBaron comes in four soothing colors: blossom, mist, rock grey and thunder grey. We also present The BonBaron in sherpa. This super-soft, lammy-like fabric underscores the chair's cuddlesome character. The BonBaron Sherpa comes in two earthy tones: cider and ecru.
