HEIGHT-ADJUSTABLE DESKS

Flexible working made easy

se:lab e-desks impress with their intuitive functionality as well as their timeless design. They can be continuously adjusted in height by means of a button, so that the right working height can be selected for every task and position.

Whether for open office landscapes or for the home office, se:lab e-desk cuts a fine figure everywhere due to its various design options.

e-desk

As a height-adjustable workstation, se:lab e-desk offers pragmatic solutions. It focuses on alternating posture between sitting and standing. With its organic design language, it blends harmoniously into any setting.

e-desk A

Concise design and stylish design language – se:lab e-desk A is a chic desk and reliable companion when it comes to productive work. It can be easily adjusted to an individual's preferred height and supports ergonomic working.

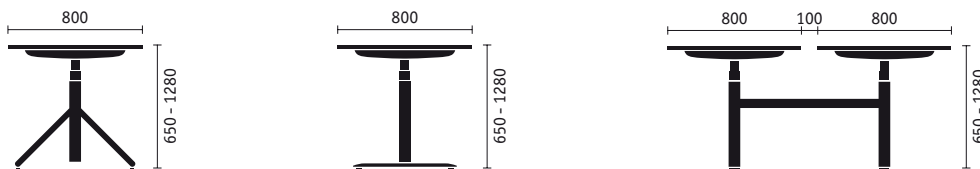

e-desk twin

Efficient use of space and structure for the office: The modern look of the se:lab e-desk twin is ideal for bench and spine configurations and agile team offices. The height adjustment allows the user to work either while sitting or standing.

DESIGN OPTIONS

Customised configuration

Dimensions

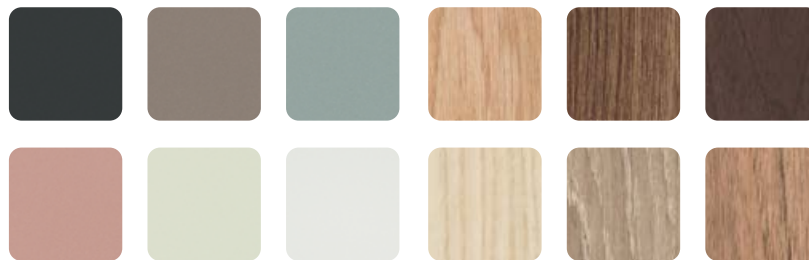

Surface colours

Over 30 colours and decorative wood effects from the current Sedus collections are available for desktops.

Desktop with rounded corners

Frame colours

The tubular steel frames are available in clear white and black. The trend colours cayenne red, fjord green and sand beige are optionally available for the A-frame of the se:lab e-desk A and the H-frame of the se:lab twin.

Options

The se:lab e-desks can also be optionally configured with castors, privacy screens, cable trays and the se:lab tray drawer.

“se:lab e-desk

*cuts a fine figure in individual
offices, open spaces and
home office workplaces.”*
