## se:cube & se:cube max

*Office cubes &  
room-in-room systems*

**NEW**

se:cube now  
with even better  
acoustics )))

# Who we are and what we do

Sedus Stoll AG was founded in 1871 and is one of the leading European manufacturers of office solutions. The product range includes seating furniture, such as swivel and visitor chairs, as well as office, conference and contract furniture – all “Made in Germany”.

The company headquarters is located in Dogern on the High Rhine in southern Germany. Another production site is in Geseke, North Rhine-Westphalia. Sedus is a company with a long tradition and 150 years of company history that has repeatedly set standards – in terms of ergonomics, manufacturing processes and sustainability. As a synonym for innovation, technology and aesthetics, Sedus constantly enriches the “office world” with new product ideas and contemporary concepts. Sedus puts a strong focus on current trends and changes in the world of work. New organisational structures and forms of work require flexible, aesthetic furnishings and custom-made solutions that enhance collaboration, communication and movement. A particular emphasis is placed on the health and well-being of the users.

For further information, go to [www.sedus.com](http://www.sedus.com)

With our solutions,  
we support people  
in expressing their  
genius at work.

# Why se:cube & se:cube max?

Additional work space:  
se:cube enables  
**more flexibility**  
for your daily tasks

By means of lift technology, se:cube can be  
**moved easily and quickly**  
when the surroundings require it

Satisfaction is up to  
15% higher among employees  
who are able to  
**choose their own  
workplace**

Source: Sedus INSIGHTS

**79%**

The 79% space efficiency  
has the greatest impact on  
costs worldwide

Source: Sedus INSIGHTS

**76%** of employees report  
that the **biggest distractions**  
of working in open-plan environments are colleagues  
**having loud telephone conversations**  
or an unscheduled meeting taking place

Source: Forbes

## se:cube max

is wheelchair-accessible and, with a size of 16 m<sup>2</sup>,  
offers space for up to 8 people

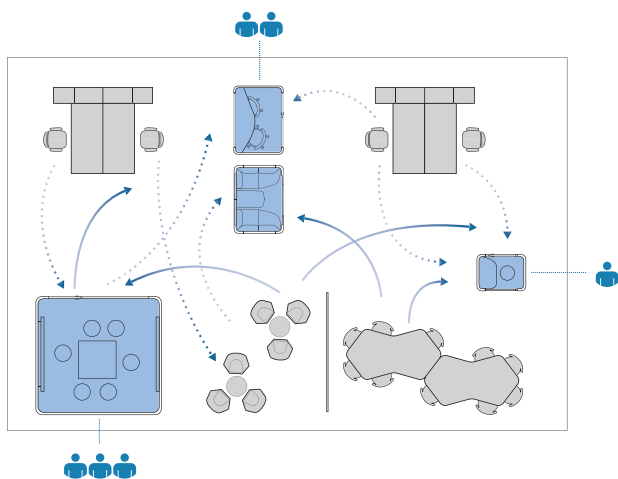

se:cube impresses with **very good sound level reduction** -  
disturbing noise is simply left outside

se:cube max, Size L with three glazed walls

An office with an open space concept and an individual design enables a flexible, dynamic workflow. Exchange and collaboration are encouraged.

-  Telephone conversation or focused work (se:cube, Size S)
-  Small meetings or focused work (se:cube, Size M/L)
-  Conference calls, discussion sessions or workshops (se:cube max)

## NEW WORKING STYLES

# When work determines the space

Open-plan room concepts, flexibility and new working styles characterise the office of the future. And this development goes hand-in-hand with a whole host of benefits: deep-rooted structures are being broken down, while communication and cooperation are promoted. Modern office space and daily routines are characterised by short distances, flexible meetings and spontaneous exchange.

Employees increasingly decide for themselves where and how they can best perform their tasks. Different work situations often alternate. Concentrated individual work can be followed by communicative activities, teamwork can be replaced by retreat or relaxation. Modern office planning must reconcile these requirements and create the necessary facilities.

Whether you're making an extended phone call, holding a meeting in a small group or knuckling down to get your own work done: the se:cube max office cubes and the room-in-room system are the elements which create a perfect symbiosis of proximity and distance. The bright design and the large glass surfaces create transparency so that the user is not isolated. The systems fit harmoniously into the surroundings, just like a piece of furniture.

# One idea – two systems

In an office environment where space is limited and should be used efficiently, intelligent furnishing is fundamental. Depending on their individual requirements, employees decide which of the two systems is better suited to their working and communication styles.

	se:cube	se:cube max
<b>Use</b>	temporary workstation (e.g. telephone conversations, video conferences, concentrated individual work, working in pairs or in a team (max. 6 people)	meetings, workshops or temporary single/double offices (max. 8 people)
<b>Planning according to workplace guidelines</b>	✗ not required, as temporary workstations	✓ for meetings and workshops
<b>Room sizes (in metres)</b>	1.5 × 1/2 × 1.5/2.5 × 2.5	3 × 3/3 × 4/4 × 3/4 × 4
<b>Room height (in metres)</b>	2.32 (2.5 m required) <sup>1</sup>	2.40 (2.8 m required) <sup>1</sup>

<b>More details</b>	from Page 9	from Page 18

<sup>1</sup>required clear room height for assembly

se:cube L with integrated whiteboard inside (left), se:cube M and S (right)

With the HCL (Human Centric Lighting) control, the light colour automatically adjusts according to the natural daylight pattern and, therefore, to the biological rhythm. This not only promotes well-being, but also the employees' ability to concentrate (see Page 13 for more information)

The Due to their intelligent design, the se:cube units can be easily moved within a room even after they have been assembled. It only takes two people about 1.5 hours to move the Size L unit.

# se:cube

A place that inspires, allows independence and adapts to the most diverse requirements. With three different sizes and several design variants, the se:cube offers exactly what is needed for the future of agile working. Its well-conceived design ensures optimal acoustics and an appealing atmosphere.

The presence detector adjusts light and ventilation via a fully automatic control system, thus ensuring that only as much power is consumed as is actually needed. The red or blue all-round LED lighting indicates whether the module is currently occupied.

The individual colour scheme and the freely selectable interior round off the office cube solution. This allows for perfect colour and style coordination with the furniture outside the cube. Has the office landscape now changed? The se:cube can be assembled without much effort and can be easily moved in its assembled state due to the unique lift technology.

## se:cube S (1.5 × 1 m)

Ideal for

- phone conversations
- video conferences
- concentrated individual work

## se:cube M (2.0 × 1.5 m)

Ideal for

- phone conversations
- video conferences
- concentrated individual work
- working in pairs

## se:cube L (2.5 × 2.5 m)

Ideal for

- phone conversations
- video conferences
- brainstorming sessions
- meetings for up to 6 people

# Acoustics as a challenge

Just like the furnishing, light or temperature, the acoustics in a room play an important role. Wherever people spend time or work, there is a certain amount of noise. Typing on the computer, the rattling of the printer and the small talk of colleagues can quickly be perceived as disturbing and thus distract from one's own tasks. Good sound absorption is, therefore, essential for a pleasant working environment.

The more we understand a conversation around us, the greater the distraction can be. Therefore, for an optimal working environment, speech intelligibility must be reduced to such an extent that conversations are only perceived as soft noise.

The soundproof ventilation unit considerably reduces the sound transmission from the inside to the outside and vice versa without obstructing the air flow.

The multi-part wall construction with integrated, acoustically beneficial material as well as the glass door with high-quality floor lowering seal and optional magnetic closure also contribute to the ideal sound insulation of the se:cube.

**Wall structure from the inside to the outside:**

1. Visible inner wall with lined fabric
2. Punched hardboard
3. Chipboard (19 mm)
4. Frame with soundproof acoustic baffling filling
5. Chipboard (19 mm)

As a closed-off cabin with acoustically beneficial components, se:cube can interrupt the spread of sound and significantly reduce distracting noises from outside.

Office noise outside the se:cube is significantly reduced on the inside

Conversations within the se:cube are reduced to such an extent that they are no longer comprehensible from the outside

\*Sound level reduction compliant to DIN EN ISO 11957 (2010): 23 dB(A) without cowl, xxx dB(A) with acoustic cowl

se:cube L with double-sided glazing

# Invisible ventilation

With the building-independent ventilation of the se:cube, fresh air is supplied via the air inlet above the ceiling luminaire. The stale air is drawn into the lower part of the wall panel and re-released back into the surrounding space via the fans above the wall. Large cross-sections and sound-insulated ventilation ducts ensure that the room is extensively ventilated and that, at the same time, noise is not transmitted. The large cross-sections of the ventilation ducts mean that the process is quiet and there is no perceivable draught.

**Complete exchange of air at 50% fan power  
(factory setting)**

Ventilation control is fully automatic via a temperature sensor and CO<sub>2</sub> sensor. There is also an option to order a switch for manual operation

se:cube L with double-sided glazing and whiteboard

## Exterior wall with whiteboard

The upright wall panels of the closed walls of the se:cube can be configured with writable whiteboard surfaces on the outside. The panels can be easily exchanged at a later date.

incl. pen and  
sponge holder

2 whiteboard panels on the se:cube L;  
exterior wall with a size of approx. 1 m x 2.2 m each

se:cube

# Lighting for the inside and outside

For optimal illumination, an LED panel is mounted on the ceiling in each se:cube. The light intensity is preset to meet the required workplace standard of 500 lux on the work surface. Fully automatic control takes place via the presence detector in the light. For manual dimming (e.g. for a presentation on a screen), a remote switch is available as an option for the se:cube.

Optionally, it is possible to use a dimmable light with colour temperature (7 levels: 2700–6500 Kelvin). There is a choice between warm white, neutral white and cold white, or to dim the light. With the so-called HCL control (Human Centric Lighting), the light colour adjusts automatically according to the natural daylight pattern. The use of HCL light control stabilises people's "inner clock" and improves concentration, regeneration, mood and willingness to perform.

## Colour temperature change (HCL lighting)

### Cold white (6500 K)

This colour is often used in areas in which colour fastness is important. It corresponds most closely to daylight

### Neutral white (4000 K)

This is the most neutral colour, it keeps people active and awake and is most suitable as localised work illumination

### Warm white (2700 K)

This colour is comparable to halogen and incandescent lamps and creates a cosy and relaxed atmosphere

To provide perfect light for video conferences, se:cube S can be equipped with LED lights to the left and right of the work surface

## Presence lighting

An all-round glowing red or blue LED line indicates that the se:cube is currently occupied.

se:cube

# Technical details

The se:cube impresses with its timeless design and its technical features: Sedus has thought of everything, from the lighting to the ventilation. In addition to the standard fittings, there are a number of optional elements that can be installed and added.

## Glass manifestation

The glass door and glass fronts of the se:cube are fitted with glass manifestation film as standard (in accordance with safety guidelines). If desired, it can be left out or replaced by the customer's own glass manifestation.

- ✓ glass manifestation film at eye level (1400 mm from the floor)
- + without glass manifestation

✓ Standard + Optional

### 1. Interior wall design

- ✔ covered with fabric or PET felt in light grey
- + integrated whiteboard with magnetic strip at the top as well as pen and sponge holder at the bottom

- + ready for invisible monitor mounting

- + utensils compartment for note-pads, pens or remote control
- + coat hook

### 2. Exterior wall design

- ✔ melamine white, glazed door
- + melamine, painted
- + glass on both sides
- + full-surface, writable whiteboard

### 3. Safety glass

- ✔ standard glass manifestation film
- ✔ 10.76 mm laminated safety glass with an intermediate acoustic foil

### 4. Door

- ✔ 10.76 mm laminated safety all-glass door with an intermediate acoustic foil and lowerable floor seal
- ✔ lock case with a dummy cylinder allows for use of customer-specific locking systems

### 5. Ramp

- + TÜV-tested ramp made of non-slip rubber to bridge door thresholds and reduce risk of tripping

### 6. All-round presence lighting

- + glowing red or blue LED line indicates that the room is occupied; it is controlled by means of a presence detector

### 7. Controls (lighting/ventilation)

- ✔ temperature and CO<sub>2</sub> sensors monitor and control lighting and ventilation fully automatically
- + remote switch for manual control

### 8. LED lighting

- ✔ is automatically switched on when someone enters the room and provides a pleasant light (neutral white 4000 K)
- + dimmable as an additional feature or with HCL control
- + video conference lighting for all se:cube S settings

### 9. Power and data cabling

- ✔ outlets are easily accessible above or inside the desk
- + USB charger A/C and RJ45

### 10. Monitor arm

- + for tables placed in front of glazed or closed walls (opposite the door), it is possible to fit a monitor arm for mounting a screen

### 11. Furnishings

- ✔ accurately fitting, fully integrated furniture configurations (see Page 28)
- + loose furniture from the Sedus standard collection

se:cube

# Individual colour scheme

se:cube can be customised to suit any taste or requirement. The office cubes can be set up in brand colours, discreet colours or as an eye-catcher. The large selection of colour collections offer numerous possibilities.

Colours and materials for the se:cube:

- |                         |                            |
|-------------------------|----------------------------|
| 1 Exterior colour       | 5 Table/sofa frame         |
| 2 Ceiling on the inside | 6 Desktop                  |
| 3 Interior wall         | 7 Carpet                   |
| 4 Sofa                  | 8 Door frames and profiles |

## 1. Exterior colour

Standard: Melamine, clear white  
Optional: More than 10 plain coloured finishes (from the Sedus collections Colour Harmony and Architecture Line)

## 2. Ceiling on the inside

Melamine, clear white

### 3. Inner wall

#### PET felt

Standard: PET felt in light grey  
Optional: Colours from the Sedus collections  
Nova, Atlantic Screen, Era Screen, Sophie Screen  
(see below)

#### Nova

Selection from a total of 13 colours

#### Atlantic Screen

8 colours

#### Era Screen

11 colours

#### Sophie Screen

7 colours

### 4. Sofa

Selection from more than 140 colours and different materials

To match the interior walls, the upholstery of the sofas is available from the following fabric collections in the Sedus portfolio: Era, Nova, Cura, Fame, Step, Imitation leather, Milano, Remix, Tempt, Breeze Fusion, Morph, Steelcut Trio 3, leather

### 5. Table/sofa frame

#### Clear white

#### Black

Clear white or black powder-coated  
(desk and sofa frame always the same colour)

### 6. Desktop

#### Melamine, clear white

About 40 colours

Standard: Melamine, clear white  
Optional: Approx. 40 colours from the Sedus collections (natural wood veneer, melamine: Wood Selection, Architecture Line and Soft Touch)

### 7. Carpet

#### Interface Composure Harmonious

More than 30 colours

Standard: Interface Composure Harmonious  
Optional: Any other colour from the Interface Composure Collection

### 8. Door frames and profiles

#### Aluminium structured graphite, matt

## ROOM-IN-ROOM SYSTEM

# se:cube max

The sophisticated room-in-room system se:cube max complements the se:cube product family and offers large retreats for meetings, workshops and video conferences. The self-sufficient se:cube max can also be used as a single or double office in open-space landscapes. The base-free room-in-room system is not connected to the building structure and can, therefore, also be placed on surfaces with integrated floor heating.

Different versions and sizes are available for the se:cube max. The door side is always fully glazed. In addition, one or two other sides can be glazed.

se:cube max S (3 × 3 m)

se:cube max M (3 × 4 m)

se:cube max L (4 × 4 m)

Other sizes are available upon request

At least one wall is always designed as a closed technical wall. It is the core of the se:cube max and contains the ventilation unit as well as all necessary connections for the room's power supply. In addition, this wall can also be used to mount a monitor.

### Structure of the technical wall

Air outlet for exhaust air (in the ceiling)

Fabric-covered or PET felt-covered panels on the technical wall improve room acoustics

Presence detector

As an option, it is possible to use a whiteboard in the middle section

Technical panel:  
• hides cables and power supply  
• connections: 2× power, 1× USB charger  
• monitor mounting option (standing or sitting height)

Concealed fan and sound-insulated exhaust air ducts inside the technical wall

Air inlet for stale air from the interior and inspection flap for replacing the air filter

Presence detector, temperature sensor and CO<sub>2</sub> sensor are used for fully automatic control of lighting and ventilation

Fresh air is drawn into the room via an invisible sound absorber integrated in the acoustic ceiling

se:cube max is placed on the existing building infrastructure without a base and is wheelchair-accessible as there is no door threshold

se:cube max, Size L, with 3-sided glazing and whiteboard surface on the outside

## Interior and exterior walls with whiteboard

The upright wall panels of the closed walls of the se:cube max can be configured with writable whiteboard surfaces both on the inside and outside. The panels can be easily exchanged at a later date without using any tools. On the technical wall with the horizontal panels, the middle panel can also be supplemented with a whiteboard. It is also possible to mount a screen, in addition to a whiteboard.

Whiteboard on the technical wall with integrated magnetic strip; additional large whiteboards are possible on simple closed walls

Easily replaceable whiteboard panels on interior and exterior walls:

- wall length of up to 3.5 m: 3 panels
- wall length of over 3.5 m: 4 panels

se:cube max

# Lighting on demand

Depending on the application, various lighting set-ups are available for the se:cube max:

- Meeting set-up
- Workshop set-up

## Meeting lighting set-up

In this set-up, two LED panels are mounted in the centre of the room and perpendicular to the technical wall. This allows for homogeneous illumination of the workspace when a conference table is set up facing the technical wall. Users can choose between dimmable lighting and a version with colour temperature change and HCL control.

Luminaire placement for Meeting lighting set-up

## Workshop lighting set-up

Depending on the size of the room, 4 to 6 dimmable LED luminaires are evenly distributed across the room and integrated flush into the ceiling. The wide-area illumination of the room is optimal for movable furniture on castors and is thus ideally suited for workshop environments.

Luminaire placement for Workshop lighting set-up

## Presence lighting

A glowing red or blue LED line indicates that the se:cube max is currently occupied.

# Good acoustics for every place

The sound insulation of the se:cube max is so good that the room-in-room system can be positioned in the middle of an office without neighbouring areas interfering with each other in terms of acoustics. se:cube max uses ceiling and wall absorbers specifically made for this purpose.

The following factors also influence the room acoustics of the se:cube max: flooring, number of glazed or closed walls, interior design.

The PET felt panels in the ceiling and the fully insulated technical wall improve the reverberation time of the room-in-room system.

se:cube max is a closed-off room with acoustically effective components which interrupt the propagation of sound and improve speech intelligibility inside. The sound level reduction is 29 dB(A)\*. Disturbing noises from the outside are not eliminated completely, however, they are significantly reduced.

\*according to DIN EN ISO 11957 (2010)

Office noise is reduced such that it is hardly perceptible inside

In a typical office environment, conversations inside the se:cube max are no longer comprehensible outside

se:cube max, Size L, with 3-sided glazing: The inlets and outlets for fresh air and exhaust air are visible at the top

# Fresh air and quiet ventilation

With the independent ventilation of the se:cube max, fresh air is supplied via the air inlets in the ceiling. The stale air is drawn into the lower part of the technical panel and released back into the surrounding room via the fans above the technical panel. Large cross-sections and sound-insulated ventilation ducts ensure that the room is extensively ventilated and that, at the same time, noise is not transmitted. This means that the process is quiet and there is no perceivable draught. An additional air filter can be integrated as an option.

## Complete exchange of air at 100% fan power

Ventilation control is fully automatic via a presence detector with a temperature sensor and CO<sub>2</sub> sensor. There is also an option to order a remote switch for manual operation

■ Fresh air  
■ Exhaust air

se:cube max

# Technical details

se:cube max is available in three sizes and various furnishing options. Its technical equipment and optional elements make the system a top-class workstation.

## Glass manifestation

In order to meet safety requirements in the office, se:cube max is delivered with a glass manifestation film as standard.

- ✓ glass manifestation film at eye level (1400 mm from the floor)
- + without glass manifestation
- + glass manifestation for wheelchair-accessible use (1400 mm and 600 mm from the floor)

✓ Standard + Optional

### 1. Interior technical wall

- ✔ covered with recycled PET felt
- + fabric-covered panels
- + Central panels to the left and right as writable whiteboard with integrated magnetic strip at the top and pen and sponge holder at the bottom

### 7. All-round presence lighting

- + glowing red or blue LED line indicates that the room is occupied

### 2. Exterior wall panels

- ✔ panels in melamine, clear white
- + melamine, painted
- + writable whiteboard surface

### 8. Controls (lighting/ventilation)

- ✔ fully automatic control of lighting and ventilation via the presence detector in the technical panel
- + remote switch for manual control

### 3. Glass walls

- ✔ 12.76 mm laminated safety glass with an intermediate acoustic foil
- ✔ glass manifestation film at eye level
- + glass manifestation for wheelchair-accessible use

### 9. Lighting

Meeting lighting set-up

- ✔ 2 dimmable LED panels
- + remote switch for manual control
- + 2 LED panels with colour temperature change and HCL control (incl. remote switch)

### 4. Door

- ✔ 10.76 mm laminated safety all-glass door with an intermediate acoustic foil and lowerable floor seal
- ✔ lock case with a dummy cylinder allows for use of customer-specific locking systems

Workshop lighting set-up

- ✔ 4 or 6 recessed LED luminaires integrated flush into the ceiling for illumination of the entire room
- + remote switch for manual control

### 5. Magnetic closure

- ✔ the magnetic closure ensures that the door is pulled towards the seal on all sides

### 10. Power and data cabling

- ✔ connections for 2× power, 1× USB charger (A/C) in the technical panel
- + additional two power sockets if a monitor is mounted

### 6. Wheelchair-accessible use

- ✔ without a door threshold, thus enabling wheelchair-accessible use

### 11. Furnishings

- ✔ various furnishing options to fit the intended use (Page 29)

# Individual colour scheme

se:cube max can be customised to suit any taste or requirement: in brand colours, discreet or as a colourful eye-catcher. The large selection of colour collections offer numerous design possibilities.

Colours and materials for se:cube max:

- 1 Walls and ceiling exterior colour
- 2 Interior wall
- 3 Technical wall
- 4 Technical panel
- 5 Ceiling on the inside
- 6 Door frame and profiles

## 1. Walls and ceiling exterior colour

More than 10 colours

Standard: Melamine, clear white  
 Optional: More than 10 colours from the Sedus collections Architecture Line and Colour Harmony

## 2. Inner wall

Melamine, clear white

Whiteboard

The ceiling is in clear white as standard.

Optionally, the colour of the ceiling can be matched to the exterior colour of the se:cube max.

This is recommended if the room-in-room system is also visible from above

## 3. Technical wall

PET felt (light grey)

Standard: PET felt in light grey  
 Optional: Colours from the Sedus collections Nova, Atlantic Screen, Era Screen, Sophie Screen (see below)

Nova

Selection from a total of 13 colours

Atlantic Screen

8 colours

Era Screen

11 colours

Sophie Screen

7 colours

## 4. Technical panel

Melamine, clear white

About 25 colours

Standard: Melamine, clear white  
 Optional: Approx. 25 colours from the Sedus collections (Melamine: Wood Selection, Architecture Line and Colour Harmony)

## 5. Ceiling on the inside

PET felt (light grey)

## 6. Door frames and profiles

Aluminium structured graphite, matt

# Carefully harmonised with each other

A harmonious working environment contributes significantly to well-being and productivity. In addition to sophisticated furnishings, appealing fabric and material combinations and the choice of colour accents are decisive factors.

Whether “Smart Balance”, “Soft Being”, “Urban Living” or “Multi Creation” – se:cube can easily be set up with any of these colour schemes.

## Do you need support in planning and implementation?

The experts from Sedus Workplace Consulting are looking forward to helping you design your modern smart office. From analysing the floor plan and designing the concept to choosing the colours from the colour schemes – at Sedus you get everything from a single source.

### Smart Balance

structured, technical, functional,  
light, reduced, quiet

### Urban Living

comfortable, respectable, ele-  
gant, urban, intense, timeless

### Soft Being

gentle, calm, balanced,  
natural, inviting, regenerative

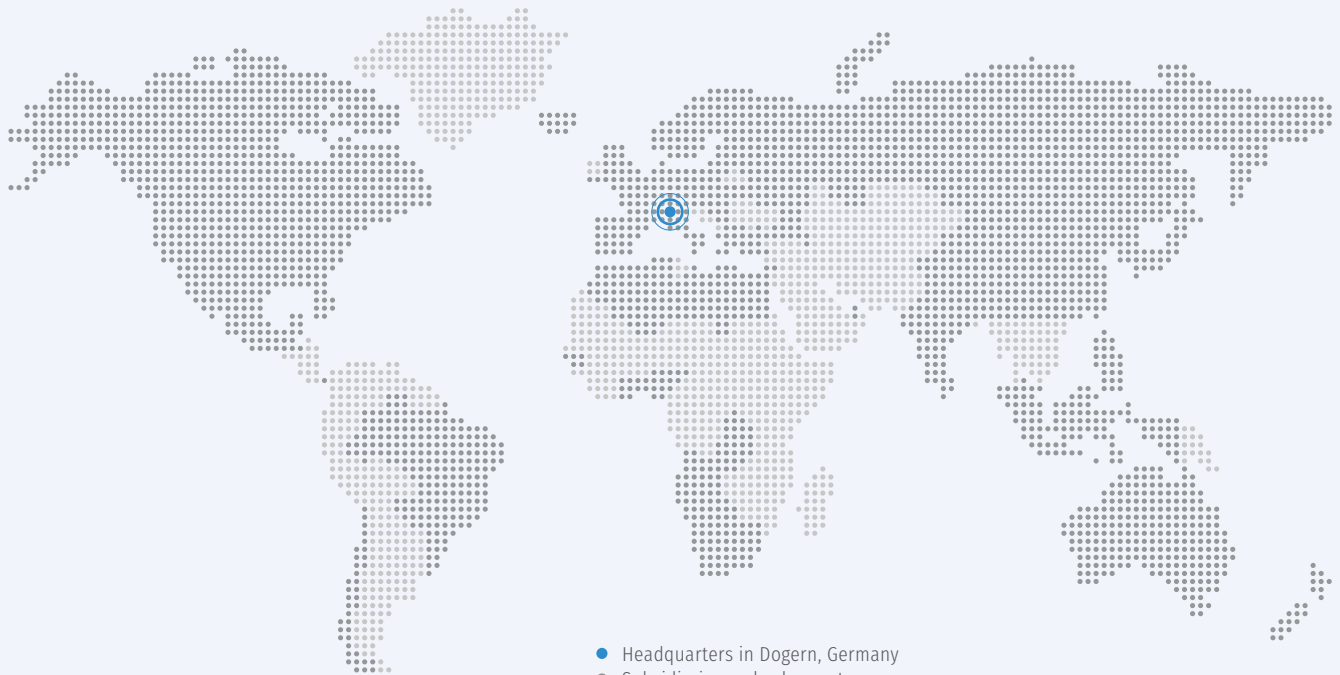

### Multi Creation

motivating, inspiring, open,  
creative, dynamic, active, free
