**vitra.**

Spring is the time to open our doors and windows, to let nature in and take our lives outside. As the evenings grow longer, we can relax outdoors with family and friends and enjoy meals around the table.

**Wire Chair LKR**  
**Charles & Ray Eames, 1951**  
**New Lounge-base**

Featuring a welded steel wire seat shell, the compact LKR chair is a variation of the LSR models with a shell in fibreglass-reinforced or polypropylene plastic. Charles and Ray Eames used both wire and fibreglass versions in the furnishing of their own residence, the legendary Eames House in the Pacific Palisades neighbourhood of Los Angeles. Like all other models in the Wire Chair family by Vitra, the LKR is available without upholstery, with a seat cushion or with a two-piece seat and back cushion – also known as the 'Bikini' pad due to its shape. In the powder-coated variant without upholstery, the LKR is also suited for outdoor use.

The Wire Chair LKR is available in four new colours.  
More information can be found under [vitra.com/wirechair](https://vitra.com/wirechair)

Buy 4 chairs or more and receive one seat cushion per chair as a gift.\*

### Soft Seats & Soft Seats Outdoor The perfect cushion for every chair

Soft Seats are loose cushions that add pleasant comfort to unupholstered chairs. Thanks to zip fasteners, the covers can be easily removed for cleaning or replacement. The two-centimetre-thick thermopressed fleece padding retains its shape and is 100% recyclable. In addition to the Soft Seats, there is now a version for outdoor use: Soft Seats Outdoor. They are available in three shapes so that there is a suitable cushion for every chair model.

\* Offer valid from 23 March until 30 June 2023. You will receive one Soft Seats or Soft Seats Outdoor cushion (type B) per chair in selected fabrics when you buy 4 or more of the following chairs: Eames Plastic Side Chairs, Eames Fiberglass Side Chairs, Wire Chair, HAL RE/HAL RE Armchair, Panton Chair/Panton Chair Classic, EVO-C. Available fabrics: Hopsak (11 colours), Plano (5 colours), Cosy 2 (5 colours) for Soft Seats and Simmons (3 colours) for Soft Seats Outdoor.

For more information about available colours and materials, visit [vitra.com/softseats](https://vitra.com/softseats)

## Terracotta Pots Thélonious Goupil, 2023

The Terracotta Pots are made of dense fired clay. The column-like forms of the different sized pots serve as pedestals for the plants they hold, elevating them and giving them more presence in the room. The Terracotta Pots are made of natural high-quality clay from Italy, which is pressed into shape and fired. The pots are extremely durable and water-resistant. The inside of the Terracotta Pots is glazed and they come with a drainage hole in the base.

The Terracotta Pots come in four sizes: XS, S, M and L.  
Our Guide to indoor plants and herbs can be found under [vitra.com/terraccottpots-EN](https://vitra.com/terraccottpots-EN)

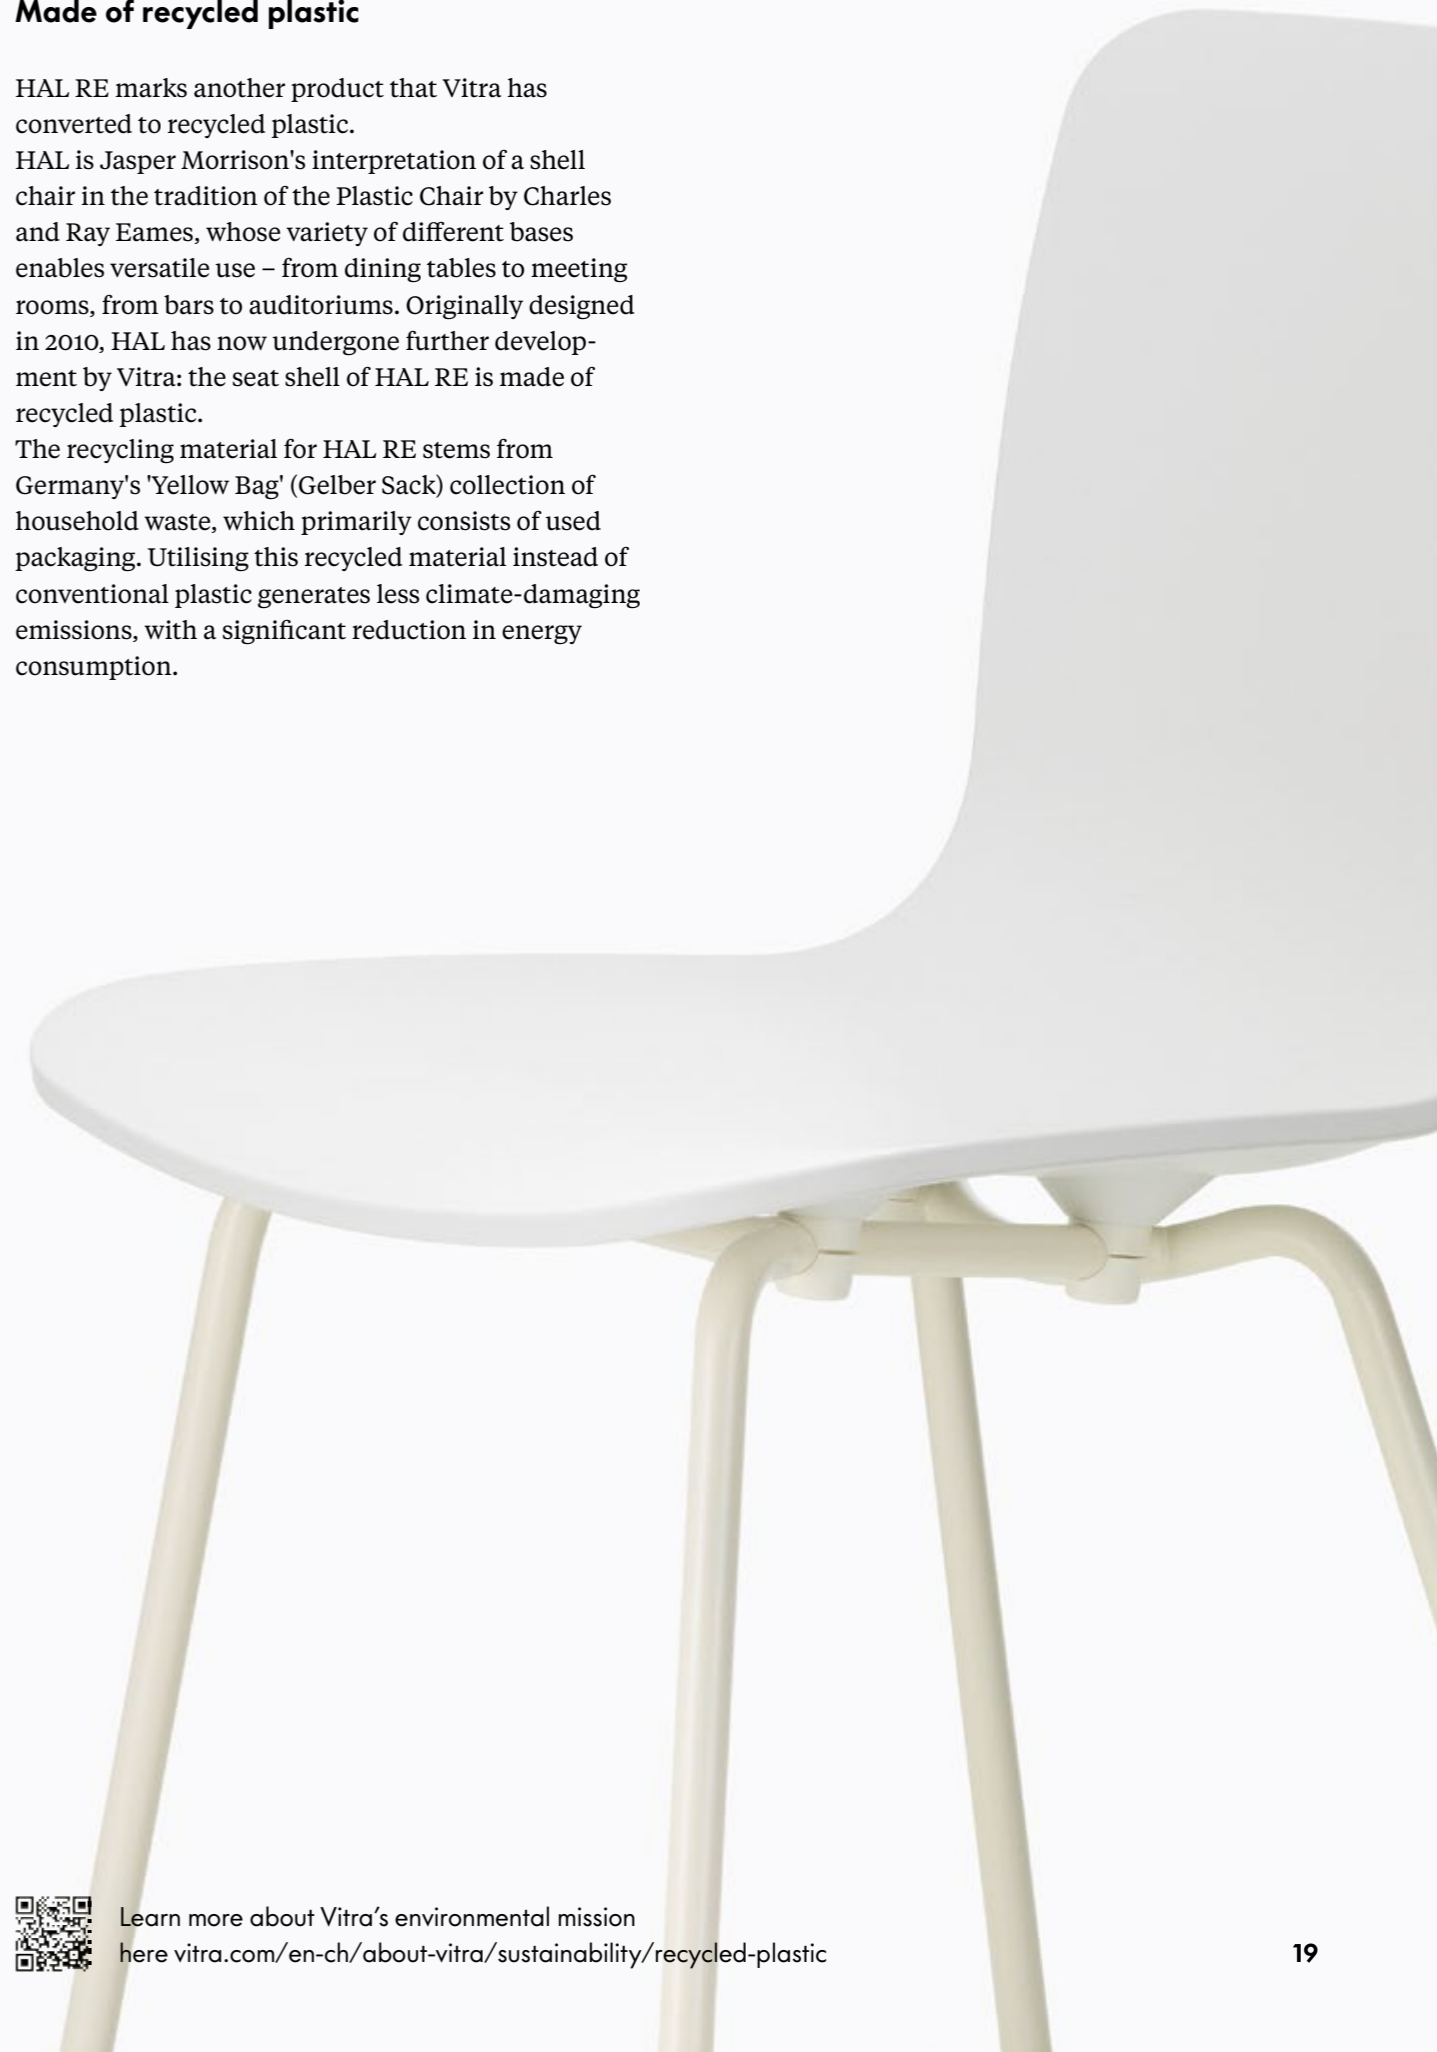

**HAL RE**  
**Jasper Morrison, 2010/2023**  
**Made of recycled plastic**

HAL RE marks another product that Vitra has converted to recycled plastic.

HAL is Jasper Morrison's interpretation of a shell chair in the tradition of the Plastic Chair by Charles and Ray Eames, whose variety of different bases enables versatile use – from dining tables to meeting rooms, from bars to auditoriums. Originally designed in 2010, HAL has now undergone further development by Vitra: the seat shell of HAL RE is made of recycled plastic.

The recycling material for HAL RE stems from Germany's 'Yellow Bag' (Gelber Sack) collection of household waste, which primarily consists of used packaging. Utilising this recycled material instead of conventional plastic generates less climate-damaging emissions, with a significant reduction in energy consumption.

## Herringbone Vessels Raw-Edges, 2019

Created by Raw-Edges, the Herringbone Collection emerged from the studio's interest in the technique of immersion dyeing. The transformations of different materials and shapes when parts of them are dipped in a dye bath exert an almost magical fascination on the design duo Shay Alkalay and Yael Mer. The Herringbone Vessels are created by repeatedly immersing ceramic bowls and vases in a coloured glaze. This process yields a pattern with an intrinsic logic, determined by the dipping angle as well as the shape and weight of the piece. As the dyeing process is performed entirely by hand, each bowl and vase in the Herringbone Collection is a unique object.
