PURE

ANDREI MUNTEANU

The Pure collection truly changed the way we think about outdoor furniture. And even after decades, its bestseller story continues. New contemporary elements like a two seat extension, a luxurious lounge and cabana are taking Pure's modularity to yet another level. Together with the five existing modular elements, comfortably accessorized with deep stylish cushions, Pure creates timeless and harmonious outdoor rooms, effortlessly adapting to every possible atmosphere.

FABRICS & MATERIALS

MATERIALS

Frame: plantation teak from East-Java, every log is handpicked during the cutting process of the tree

Hardware: 316 electropolished stainless steel

Teak is a beautiful and long-lasting wood, which is stable and resistant to weather and water. The wood is high in natural oils, which leads to low moisture absorption and high stability. Additionally, the wood is resistant to funghi, parasites, and insects.

Cabana fabrics: sunscape, sunscape velum

Roof **sunscape:** This fabric is composed of acrylic that is coated with PVC. The acrylic provides strength and dimensional stability, while the PVC coating makes the material waterproof and resistant to dirt, mildew, oil, salt, chemicals and UV rays. It also gives the material added strength and durability.

Curtains sunscape velum: Acrylic fabrics are durable, high-performance synthetic fabrics made from acrylic fibers. They have a number of advantages including mildew-resistant properties and a minimal absorbency of liquids. The acrylics Tribù uses are solution-dyed which means that they are dyed before the yarn is created. A liquid acrylic solution is mixed with the dye and is then formed into a fiber so it already has color before it is spun into a yarn. This process guarantees an optimal colour fastness. Their ability to breathe prevents mold from building up on the surfaces of the fabric. The open weave provides air flow helping to reduce heat and humidity. In addition to the technical performance, acrylic fabrics have a very soft look and feel, creating the perfect ambiance for your outdoor furniture. Our solution-dyed fabrics are treated with a special Teflon® coating to make them water repellent and resistant to stains, grease, fluids and salt or chlorine water.

HOW TO MAINTAIN YOUR FURNITURE

MAINTENANCE

Teak

Treat new **teak** with teak protector 4 à 6 weeks after installation. Teak protector applies an invisible film that prevents stains and green deposit. Soiled teak can be cleaned with teak super cleaner. Leave the furniture to dry completely and then apply teak protector. To avoid labour-intensive cleaning, you can treat the wood with teak sealer. A simple cleaning with water and a ph-neutral soap will do for many years. Teak sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew.

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.
