

# THE BONBARON SLIM

## The BonBaron Slim: big on comfort, dressed in a slimmer suit

Meet The BonBaron Slim from Fatboy. A generously sized lounge chair with bold comfort and a slimmer silhouette than its original sibling: The BonBaron. With its 90-centimeter width, it offers plenty of space to sink into, without feeling oversized. Compact enough for smaller living rooms or city apartments, yet generous enough for more spacious interiors. And with its distinctive shape and details, it adds a clear design statement to any space. Whether it's tucked into that one empty corner or takes center stage in your room: The BonBaron Slim fits right in. One sit is all it takes to know: this is your new favorite spot.

## Smart design, soft landing

Beneath its friendly, inviting appearance lies clever design. The filling is generous and super soft, while a smart inner structure gives you all the support you need. The adjustable backrest – with its signature oversized buttons – lets you tweak it to match your perfect chill mode. And thanks to the clever compartments, it keeps its shape and look, even after years of lounging. The soft fabrics of The BonBaron Slim are made from recycled polyester. More sustainable, but also super strong and seriously comfy. They are wear-resistant, made to look good for years, and just as comfy as day one. That's design with a smile.

## At home in every space

The BonBaron Slim is made for anyone who loves comfort with a bold touch of character, and a good eye for design. From a cozy reading nook or workspace to a spacious living or bedroom, this lounge chair fits right in. With its distinctive shape, The BonBaron Slim makes a subtle yet bold design statement in any interior. Pair it with a soft rug, a matching pillow or a side table, and you've got yourself a full-on relaxation corner you won't want to leave anytime soon. The BonBaron Slim delivers big comfort, while taking up just a little less space.
