1/3

Passage is a multi-purpose word. It can be found in many spheres, from travel to literature and music. It suggests movement, fluidity and transition from one place to another. The Passage collection is no less versatile.

The Passage chair is composed of a soft and fluid aluminium structure, where slides over a backrest made from a single piece of extruded aluminium. The seat can be made from a single piece of aluminium, but it can also be made from wood, fabric, rope, webbing or straw. The variety of seat finishes gives this object a unique adaptability.

Maintenance

Clean with mild soap using a sponge or cloth. Be gentle during the cleaning process; avoid aggressive scrubbing of the seater. After cleaning, ensure you remove any excess soap.

For stubborn stains, use diluted household bleach. Act promptly to clean stains; the longer they linger, the more challenging they become to remove.
