

Pat

Designer	Jean Marie Massaud
Year	2026

Pat reinterprets the archetypal forms of seating in a contemporary key, exploring the balance between formal rigour and the pursuit of comfort. Comprising a chair, armchair and stool, the collection is defined by its slender profile and tapered legs, which enhance its elegance and give the whole a light, measured presence. In the chair and armchair versions, the backrest, with its integrated movement mechanism, supports an ergonomic and welcoming seating experience, naturally following the body. The fabric or leather upholstery offers a sense of visual and tactile softness, while concealed zips preserve the purity of the design. Conceived to blend naturally into domestic spaces, Pat combines formal simplicity, functionality and attention to detail.

Structure
Made of steel rod padded with polyurethane foam.
The stool is fitted with a satin-finished aluminium footrest.

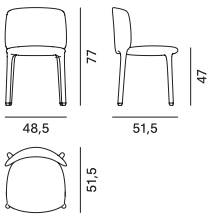

Cover
Upholstery finished with concealed zips that preserve the purity of the design language.
Fabric or leather, not removable cover.
