

Designed by Niels Diffrient, the Diffrient Lounge is a new way to work, lounge, and play—offering continuous support for work, rest, and everything in between. Combining the essential elements of a modern workspace—chair, desk, and power—into a single, elegant solution, it introduces a new typology of working: a seamless, all-in-one environment where productivity, craftsmanship, and comfort coexist.

Warranty

5 Years

Features

- **Dynamic Comfort™**—Humanscale's approach to lounge seating that supports you in every posture. With the push of a button the Different Lounge supports any posture you choose, whether upright, reclining, or anywhere in between.
- The integrated worksurface pivots smoothly into place to support work, reading, or leisure activities. When not used, it stows neatly to the side, doubling as a convenient side table.
- Integrated power access keeps devices connected and charged with two dual USB-C ports—one supporting up to 140W for laptops and high-power tools, the other up to 30W for phones and tablets—powered by a universal 100–240VAC input.
- Contoured cushions with waterfall edges follow the body's natural curves, reducing pressure points and evenly distributing weight for long-term comfort.
- Integrated armrests feature discreet adjustment buttons, allowing the headrest and backrest to be positioned independently for personalised comfort.
- Sleek, durable four-star aluminium base with 270° swivel for ease of entry and exit; adjustable glides available with or without felt pads to suit any floor surface.
- An ottoman supports legs and feet, relieving pressure on the lower body and enhancing overall comfort.
- Available in a curated selection of premium, high-performance textiles in a variety of textures, patterns, and colors.
- The Diffrient Lounge chair and ottoman are handcrafted and ship largely pre-assembled, requiring only power connection and worksurface installation before use.
