
Bolt Table

TABLES

Mario Bellini

Description

The new Bolt Table is designed by Mario Bellini for B&B Italia. After various experiences of developing wooden supports for tables, the architect proposed an unusual metal frame, extremely simple, but of strong materiality. Three steel interfacing crosspieces in angular sections create a base supporting a round top in transparent extra light glass. The table is available in a single size (diameter cm 165) and three base-frame finishes: bronze oxidized steel, sand blasted stainless steel and bright stainless steel.

Technical information

glass

Ferrules
felt

The product is conformable at
EN 15372 strength, durability and safety : requirements for non-domestic tables

Technical drawings

B&B Italia reserves the right to make technological and aesthetic improvements to its models, including changes to the sizes and materials, without notice. The technical drawings do not define the details of the product. The measurements shown are indicative and may undergo changes. In particular, the dimensions relevant to the padded parts are subject to usage tolerances over time caused by the normal adjustment of the padding.
