

## TOGETHER 290 corner seats. Design: EOOS.

Together bench - a sculpture of architectural clarity with the seating comfort of good upholstered furniture. The covers are removable. With different widths and lengths of backrest and seat, it corresponds to the space available and the size of the table.

### Product description

#### Design awards

#### Modell no.

290

#### Frame

Seat frame with steel structure. Depth of bench 68 cm.  
Attachable back parts, construction in wood.

#### Upholstery

Seat with spring core and cold cure foam construction with textile covering.  
Back cold cure foam and textile covering. Covers are fixed with Velcro and are removable.

#### Legs

Foot panels covered in the same material as body with synthetic strip glides.

#### Ordering advice

One corner consists of two sections. One section has two foot panels, the other section has one foot panel. Their position can be seen on the drawing. The extended seat length determines the distance between the end of the back and the end of the seat. It must be defined on both sides of the bench.

How to order:

1. Define the size of the bench and the general dimensions (left or right) together with the model number.

2. Define the extended seat length for the left and the right part:

[L] (R) 00 ext. seat length = 0 cm.

[L] (R) 03 ext. seat length = 3 cm.

[L] (R) 20 ext. seat length = 20 cm.

[L] (R) 40 ext. seat length = 40 cm.

The view from the front of the bench determines the position of left and right.

#### Example

##### 290-60 L20 R40

Corner bench left 313x177 cm.  
Extended seat length left 20 cm.  
Extended seat length right 40 cm.

#### Ordering advice

Side views of ext. seat length 0 cm and seat length 3 / 20 / 40 cm are different. See:
