

**CIRCLE.** Design: UNStudio/Ben van Berkel.

---

The connection of convex and concave shapes results in sweeping sculptures. The slope of the back and the seating area make up an unbroken flow from sitting upright to lying in relaxation. The height is the only thing that remains constant. Six individual elements combine to build numerous variations.

## Product description

---

### Design awards

### Modell no.

900

### Frame

Steel construction.

### Upholstery

Cold cure foam sandwich construction.

### Accessories

Bolster 900-NKR: cold cure foam with an outer layer of wadding
