Palette.

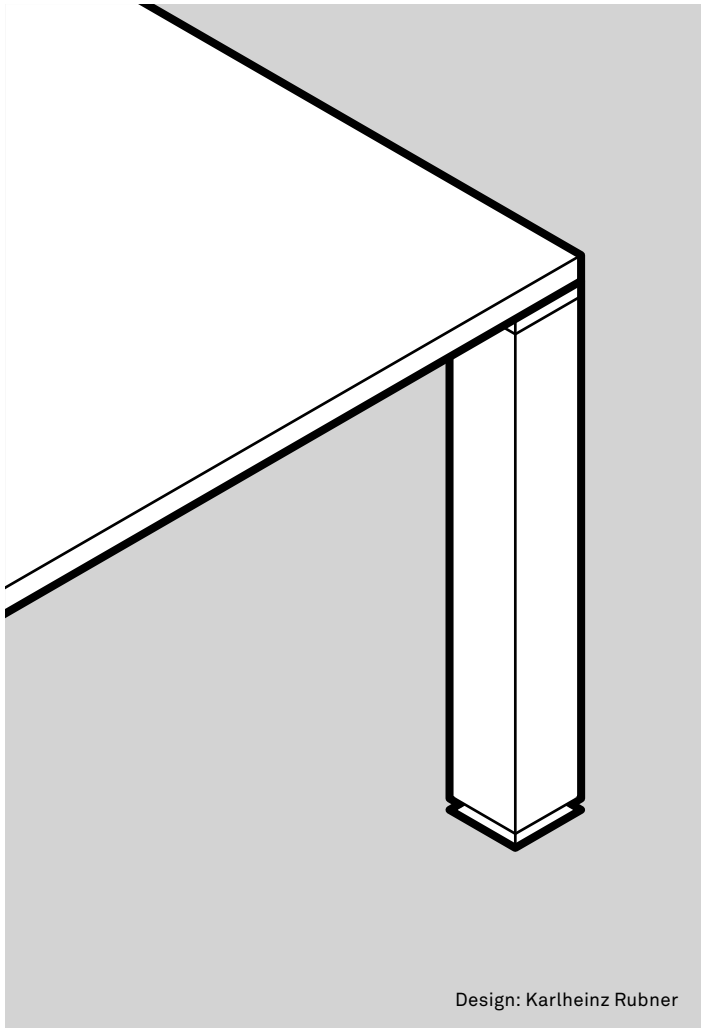
Built to last: a solid-wood table top, resting on four column-shaped, table legs that are flush with the edge of the table top. Unlike virtually any other table range, Palette stands for the contemporary archetypal table. In terms of function and aesthetic appeal, the black top of the table legs and the glide are perfection itself. But Palette can do more: in just one simple step the leg can be released and moved to accommodate another panel. As a result, you can create, extend or divide tables to suit the way you want to use the room, procedures and numbers concerned – from a table for one or two, to a conference layout.

The rigid blockboard tops do not require any underframes. This creates more legroom and allows space-saving stacking (like palettes) of any table tops not currently needed. And what's more, in addition to standard table tops, the ingenious design allows customised ones and the integration of state-of-the-art media equipment too.

Design: Karlheinz Rubner

Palette. 640 range. Technical details.

Wilkhahn



Design: Karlheinz Rubner

Function
Flexible prestigious table system with options ranging from the standalone table to sophisticated conference table systems for office, seminar and conference spaces. Table top formats and edges as well as table leg types can be optionally adapted to integrate with different design concepts. Ideal for customised conference table systems and integrating state-of-the-art multi-media equipment.

Standardised system panels for table configurations:
All standardised system panels can be connected with one another. Panels for specific table systems can only be combined with each other, i.e. not with standardised system panels.

Frame
Legs in square aluminium profile 100 x 100 mm, clear anodised or coated, with four pins each and connected with a bayonet lock integrated into the table top. Optionally with legs in round Ø 65 mm aluminium tubing (also possible here with a bright chrome-plated finish).
Base elements with black polyamide glides.

Core material of table top
Laminboard with straight, concealed lipping. Integrated connecting mechanism for attaching the legs.

Table top group 1 – laminate
Table top thickness 39 mm

Variant 1
Laminate (single colour) from Wilkhahn's colour and surface samples with solid beech lipping with a natural oiled finish. Wood decor laminate on request.

Variant 2
Soft matt laminate from the Wilkhahn colour and surface samples with solid beech lipping with a natural oiled finish. Anti-reflective, soft-touch surface with anti-fingerprint characteristics.

Table top group 2 – veneer
Table top thickness 39 mm
Variant 1: Beech veneer based on the Wilkhahn woodstain colour samples with laminated beech lipping, colour matched as far as possible with the veneer, or oak or ash veneer based on the Wilkhahn woodstain colour samples with lipping, colour matched as far as possible with the veneer.
Variant 2: Maple, walnut or elm veneer based on the Wilkhahn woodstain colour samples with wood lipping colour matched as far as possible with the veneer.

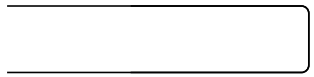
Veneer type
As a standard, the veneer panels are slip-matched. Surfaces sealed with clear lacquer: Oak, ash, walnut and elm veneer closed-pore: maple and beech veneer. Bottom of table in beech veneer, mostly colour matched with the veneer on the table top. Some specific growth features possible.

Standards
The Palette tables comply with the ANSI/BIFMA X 5.5 standard.

When placing repeat orders, please indicate whether your table tops have slip-matched or book-matched veneer.

We guarantee that the pattern of the veneer will be continuous on the joining edges up to 270 cm max.

Edge profiles



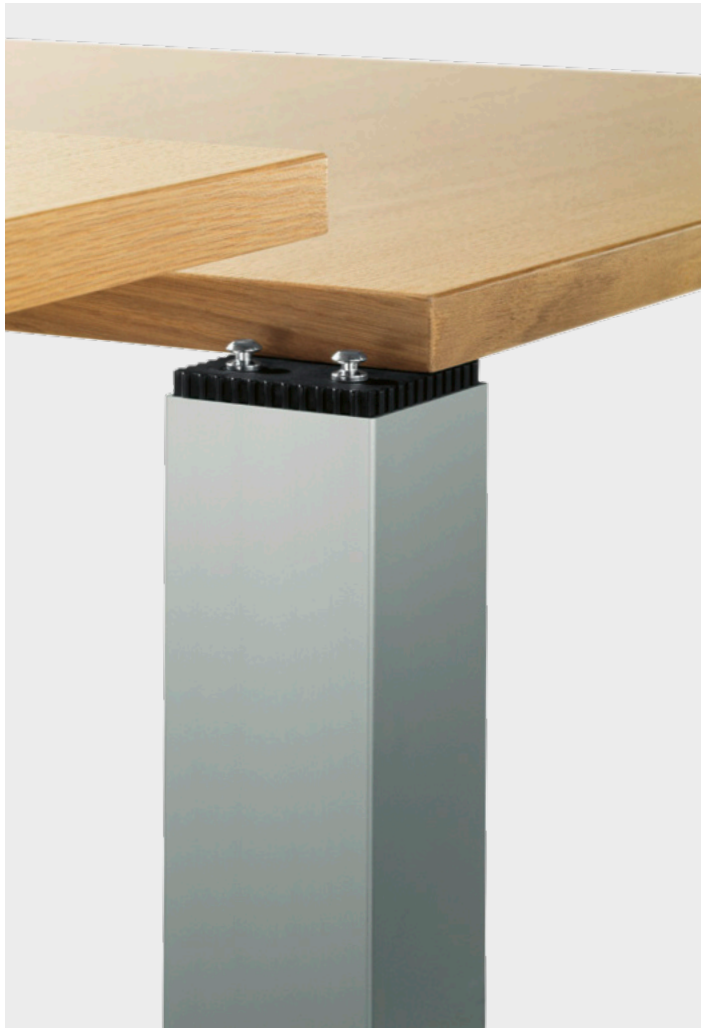
Straight edge

Please note:
Check whether the edge profiles are available for the table formats and configurations beforehand. Additional charges for anything other than a straight edge profile on request. Only tables with straight sides can be linked with one another.

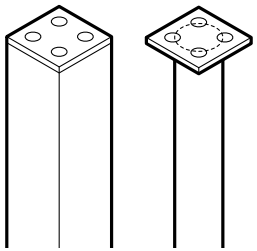
Subject to change.

Palette. 640 range. Product types.

Wilkhahn



Veneered table tops and laminate (not pictured) each available as specified on Wilkhahn's material sample card. Bright chrome-plated aluminium table frames (not pictured), coated in a silver satin finish or black and clear anodised (not pictured).



Leg shapes for systems tables and table layouts: square and round. Different table edges, veneers and laminates leave plenty of room for the imagination.

Wilkhahn

Table top groups

Laminate, veneer type 1 or 2, soft matt laminate,
you can find further surfaces in our media center.

Table legs

Clear anodised, black or silver-coated matt satin finish
(Round tubing also chrome-plated aluminium)

Laminate. The material is made by bonding cellulose and décor paper layers, as well as resin, by applying heat and pressure. This produces an extremely tough surface that comes in a variety of different colours. Laminate is highly recommended for areas where the tables are subject to a lot of wear and tear because they are frequently moved around for example.

Wood veneers. Natural wood is a living material: in the way it looks and changes over the years. Sometimes more significantly and sometimes more subtly, depending on the type of wood and how light it is. If a more consistent look is preferred, stained surfaces or industrially produced veneer are available.

The digital sample colours differ from the originals.
You can find our current fabric collection in our media center.

High-quality tables built to last with future-proof versatility
The understated design conveys the sort of quality that looks set to endure and means that the table can be used for an almost unlimited period of time too. Each and every table and module is always ready to take on a new role. Wilkhahn only uses hard-wearing materials to ensure the quality fulfils what the design promises:

- The table tops consist of bend-resistant lamin board whose core is created from vertically bonded solid wood strips; the robust lipping is also made of renewable solid wood. As a result the table requires no underframe or frame.
- Natural materials such as laminates and genuine wood veneers are applied for the surfaces. Veneered table tops are protected with water-based varnish low in solvent content.
- Some of the table legs made of aluminium extruded profile and the steel locking mechanism consist of materials that have already been recycled and can be recycled again after a long service life. Palette is exceptionally repair-friendly because we only use mechanical connections that are very easy to release.

After 17 years on the market, Palette is now considered a classic piece of furniture among the versatile table ranges. Should table tops show unwanted signs of wear and tear after a long period in use, Wilkhahn can refurbish or replace them.
